ACKNOWLEDGEMENT

I would like to express my special thanks and gratitude to our Mrs. Snehlata Mandal (project incharge) who gave me this opportunity to represent the mini-project on the topic of ‘online gadgets and servicing’ which helped me in enhancing my knowledge of web-development from basic implementation level .

I would also like to thank Mr. Haris Khan (codewithharry.com) in making my project .

Abstract

This project is based on HTML and CSS and creation of frontend of website. In daily life the gadgets being integral part to us , this website helps to search perfect smartphone for use .

This website also helps the wholesalers to get the bulky orders from the trusted sellers along with we can also buy the various \gadgets through it easily at one tip .

In addition with the servicing center near us this website in future helps the servicing centers to contact each other and collaborate to find the solution of the complex problems .

Introduction

“my gadgets ” website is created to manage the number of different brands of the smartphones arriving with the latest technology and with evolving technology the things must change accordingly .

This website is designed in such way that a person can find the device they choose.

The website has four modules

1. Which contains the information about the smartphones
2. The dealing with the other gadgets .like headphones and speakers .
3. The bulk order module which helps the retailer to contact the big sellers and get the order of there choice .
4. The important module

This module deals with the repairing and servicing of the gadgets

If specialist were missing for particular problems then the module searches for the secondary options nearby .

Tools and Technology Used

Languages Used :

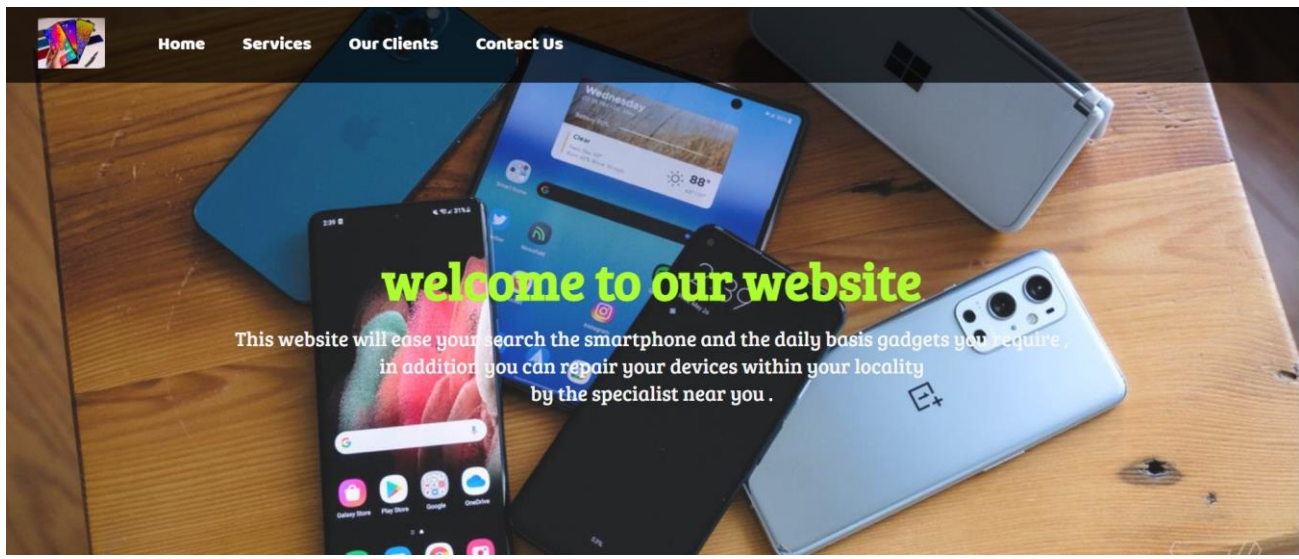

- HTML
- CSS

Code Editor Used :

- Visual Studio Code

Working With Project:

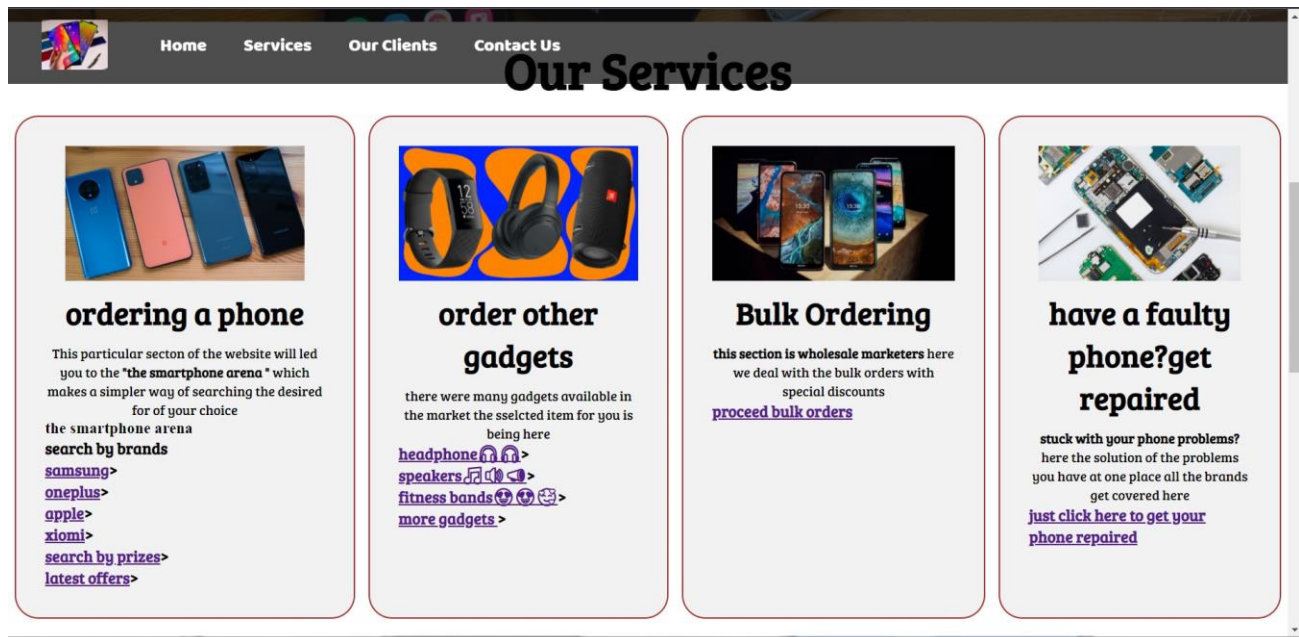

* Homepage:

This is the home page of the “mygadgets” website.

The brief information of the whole website can be drawn from here and the navigation menu of the website helps us in navigating the worthy website.

* OUR SERVICES :

The services :

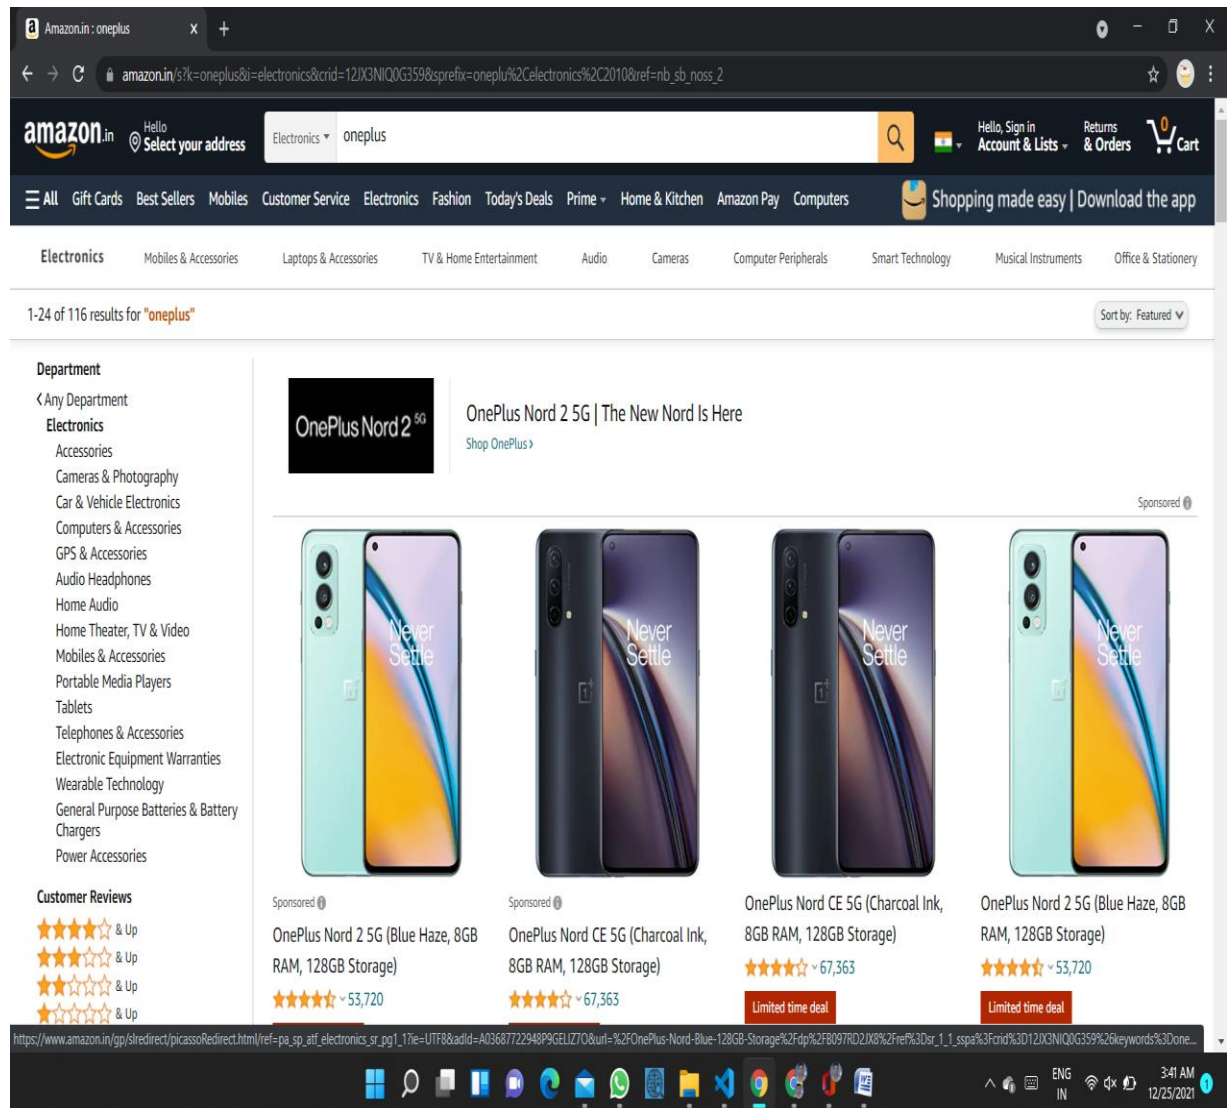

The modules have been given name in accordance to the performance of the task

1. Ordering a phone

Having the options like search by prizes and search by brands which makes it easy to implement and detect the phone of our choice .and also the latest release can be found .

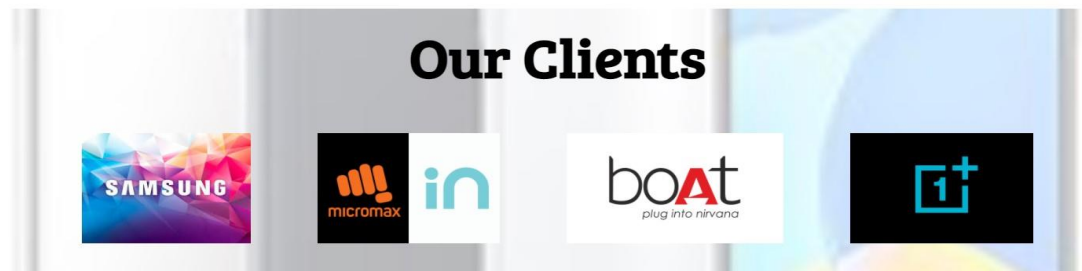

Same branding phone have been found after getting over the link

Sample for the next page opened after going through the link

2. This module deals with the other gadgets like headphone ,speakers and fitness band watches .
3. The third module being designed especially for the wholesaler of the gadgets that they can now buy the bulk amount of gadgets with higher discount rates.

Our clients: sections the trusted brands have collaboration with us :-

Contact us by dropping this information:

A "Contact Us" form with a background of hanging circular icons (phone, email, location). The form includes fields for Name, Email, Phone Number, and a Message box, followed by a "submit now" button.

Conclusion

This project have a great impact on my skills of web-development which helped my skills to get implemented through this project .

The working of this project is now based on GUI and provides the beautiful & designed way of searching through the website .

The simple way to search the desired smartphone and gadgets here along with the bulk orders .

The future aspect of this website can help the real world entities as servicing modules to get collaborated when there is an added property of backend.
